

JEAN HOUSTON, PH. D.
Visionary Activist in
Human and Cultural Development

Leaders Say...

"Jean is a great producer, a creator of significant events...as she orchestrates the myriad new voices expressing alternatives of consciousness."

-MARGARET MEADE

"Jean's humor and sense of drama make her workshops enormously entertaining. But the simple movements she gets people into can awaken them to unknown powers that transform their lives."

-JOSEPH CAMPBELL

"She's a very sensible and persuasive lady...Not only is she the most spectacular speaker I've ever heard, but she's the most hardheaded advocate of the potential we all have."

-ALEXANDER ROSS
Editor in Chief
Canadian Business

"In 1965, I began collaborating with Houston and Masters in their research in states of consciousness and continued to work with them in that project for more than ten years. Their work was foundational for the field of psychology and has been the major resource for understanding the levels and dynamics of the human psyche. From this perspective, their contribution to the field of psychology is monumental. In fact, I believe it is the greatest contribution to the field of psychology in the last hundred years."

-EWERT H. COUSINS, PhD
Teilhard de Chardin Professor
Graduate Theological Foundation
Notre Dame University
